- Bamboo sheets, planks, slats and beams in stock
- Steps, worktops, window frames, ceiling and wall systems manufactured in the Netherlands
- Industrial bamboo products
- Sustainable bamboo; both linear and circular
- Durable variant for tropical hard wood

About BAMBOOXL

Meet BAMBOOXL

BAMBOOXL only provides bamboo products. Our company stands for expertise, customer focus and drive. Sustainability when it comes to materials and circularity are an integral part of our vision. 'Don't consider used and residual materials as waste but give them a new use give'.

BAMBOOXL supplies various types of bamboo building materials to customers in the Netherlands. Semi-finished products such as plates, beams, planks or slats, as well as ready-made end products, like a staircase or a window frame. Our core activities can be divided into 6 product groups:

- Stairs
- Ceilings
- Window frames
- Window frames
- Worktops
- Window frames
- Industrial products

We are BAMBOOXL versatile in functionality, deliberately bamboo.

Conscious bamboo, the honest facts

- Bamboo is the sustainable alternative for tropical hardwood
- Bamboo is good for the environment and for your wallet
- Bamboo provides a different, warm and natural look to your interior or project.
- Bamboo semi-finished products are being assembled from bamboo strips or fibres
- Bamboo is a natural material. Like wood, it can shrink and swell, it has colour differences, may splinter and bamboo may also damage even though the material is very hard by its very nature.
- Laminated bamboo is harder than oak and compressed bamboo is harder than tropical hardwood
- Bamboo is relatively heavy

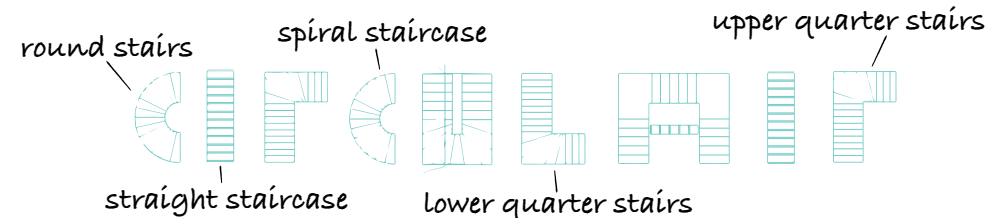

Bamboo stairs

BAMBOOXL 'kicks off' our circular stair range

One of BAMBOOXL's core activities is producing and supplying various bamboos stairs. Bamboo is a very suitable material to make stairs from, mainly due to its hardness. Our bamboo stairs can be industrially finished by us if desired. Our range varies from a straight staircase, quarter turn staircase or

spiral staircase, up to staircase covering for e.g. a steel or concrete substructure. Bamboo combined with steel or concrete gives a cosy, warm atmosphere. Bamboo Parts and semi-manufactured products for DIY projects are available. We like to work with you on the many possibilities of bamboo.

Bamboo ceilings

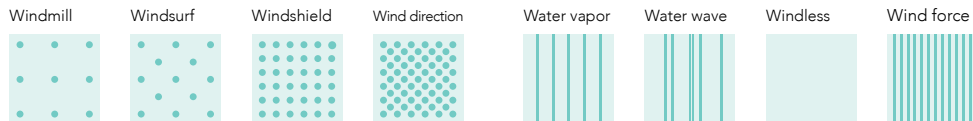

Sub ceilings: saving money, time and being good to the environment

With our innovative circular bamboo we make suspended ceilings beautiful. Our ceiling line provides your space with a totally different look immediately. The ceiling tiles can easily be used in the existing suspension system. Resulting in considerable cost savings in material and assembling. There will be less waste as well. This makes our ceiling line

ideally suited. Replace your entire ceiling or just a few tiles. For example, to add an accent at a reception, workplace, shop display, etc. In the end you can choose which light, air treatment and/or acoustics control you want to include into the ceiling system, in order to combine preservation of aesthetics with an optimal functioning.

Type plafondplaten

Bamboo frames

Sustainability starts with window frames

Bamboo is an excellent durable alternative to meranti or mahogany. Our beams can be processed into door frames, window frames and/ or facades for the interior. Exterior frames are available on request as well. Bamboo frames can be ordered as laminated or compressed bamboo, both with different product characteristics and an its own look. The composition of bamboo beams from

bamboo strips or fibres ensures that the frame retains its shape and that they remain stable. The high specific gravity contributes to 30 or 60 minutes of fire resistance of the construction. With the right finish, a bamboo window frame is low maintenance. We like to share our knowledge about bamboo and the processing and may advise on the right tools and finishing.

Did you know bamboo...

Colour

The basic colours of BAMBOOXL are KALM, PUUR, STOER and ROBUUST. The colours EERLIJK, BEWUST and RUSTIG are available on request. In order to enlarge the colour range untreated bamboo can be coloured by Pigments in lacquer or oil.

Food & drinks

Bamboo contains protein, vitamins and minerals. Bamboo shoots are therefore often eaten as vegetables and used in soups, salads or curries. But there's also bamboo beer, tea and wine! In Asia, the bamboo beetle is considered a delicacy.

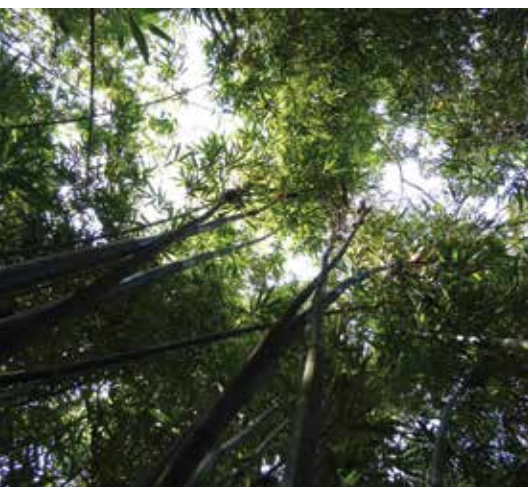

Sound

Bamboo plants act as noise barriers along the Dutch highway. The cavities in the round bamboo stems make for excellent sound insulation. This allows our bamboo ceilings to absorb 0.6 to 0.85 dB of noise.

Sport

The hardness of bamboo makes it perfect material for sports equipment. Bamboo is used for making skis, arches, snowboards, baseball bats, bicycles, skateboards, and even boat drivers.

Clothing & Accessories

T-shirts, briefs, socks, diapers, glasses, jewellery, watches. This is only a small selection of the application of bamboo the clothing and accessories industry. Bamboo is naturally antibacterial and therefore a very suitable alternative to cotton.

Bamboo stairs

We didn't call our bamboo stair range circular for no reason. With bamboo as a bio-based material we focus on the circular economy.

Bamboo, the versatile mood creator

Create your own style with bamboo in the interior, private, in the office or in your hospitality establishment. Bamboo is durable, beautiful, hard and provides a warm atmosphere. Worktops from BAMBOOXL are beautiful as a desktop or tabletop, but can also be used as a wall unit or as a desk. You may also use bamboo in the kitchen and

bathroom, provided you apply proper finishing. Our products can be industrially lacquered. The assortment consists of bamboo boards, planks, beams, slats and massive trunks. You can create your own cupboard or bed board for example, as well as order boards for on the wall. We can also provide you with stairs, frame or ceiling.

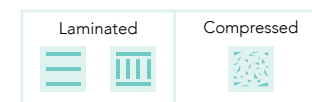

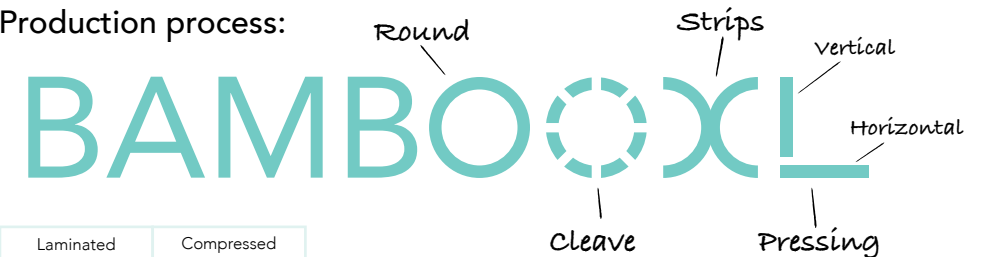

A good material is half the work

We have a varied assortment, consisting of solid bamboo trunks, plates, beams and slats. Bamboo can be used for everything (hard) wood is used for. From stairs, window frames, walls, ceiling cladding to furniture. We know the possibilities and limitations and may advise on processing and finishing of bamboo.

Standard sizes are on stock in our warehouse near Utrecht. Are u furniture maker, interior decorator, contractor or do you have a construction company? This means you can order from us. Residual sizes are sometimes available at reduced prices. These can be picked up by appointment and gone=gone.

Production process:

Bamboo inside out

With a patented production process from China, the BAMBOOXL colours TROTS and ROBUUST are made suitable for outdoor use. This method has been used for over 10 years now and has proved itself time and again. You can use our top quality bamboo both indoors and outdoors. Bamboo is an excellent choice for terraces and is a sustainable alternative to

hardwood. With durability class I and mould class 0, our outdoor bamboo scores better compared to many other alternative (tropical) woods or bamboo composites. We would also like to emphasize the shape stability. Bamboo can also be used for infra and/or road applications, as well as hydraulic engineering. Convince yourself and pay us a visit.

Production for specific bamboo parts

For manufacturers or industrial customers BAMBOOXL supplies custom bamboo production work on. CNC machining, drilling, inserts, rebates, recesses and/or round work are operations that we may carry out for you. If desired, your product can be lacquered by us as well. All these operations are done under

one roof. This is environmentally friendly and cost effective. BAMBOOXL stands for one clear contact person, excellent service and extensive knowledge of bamboo, experience with its machining, using the best tools and the right finish. Make an appointment or inquire about the prices for your product.

Our bamboo fusion cuisine

Asian bamboo with a sauce of solid Dutch production at a modern machine park results in high-quality BAMBOOXL end products.
